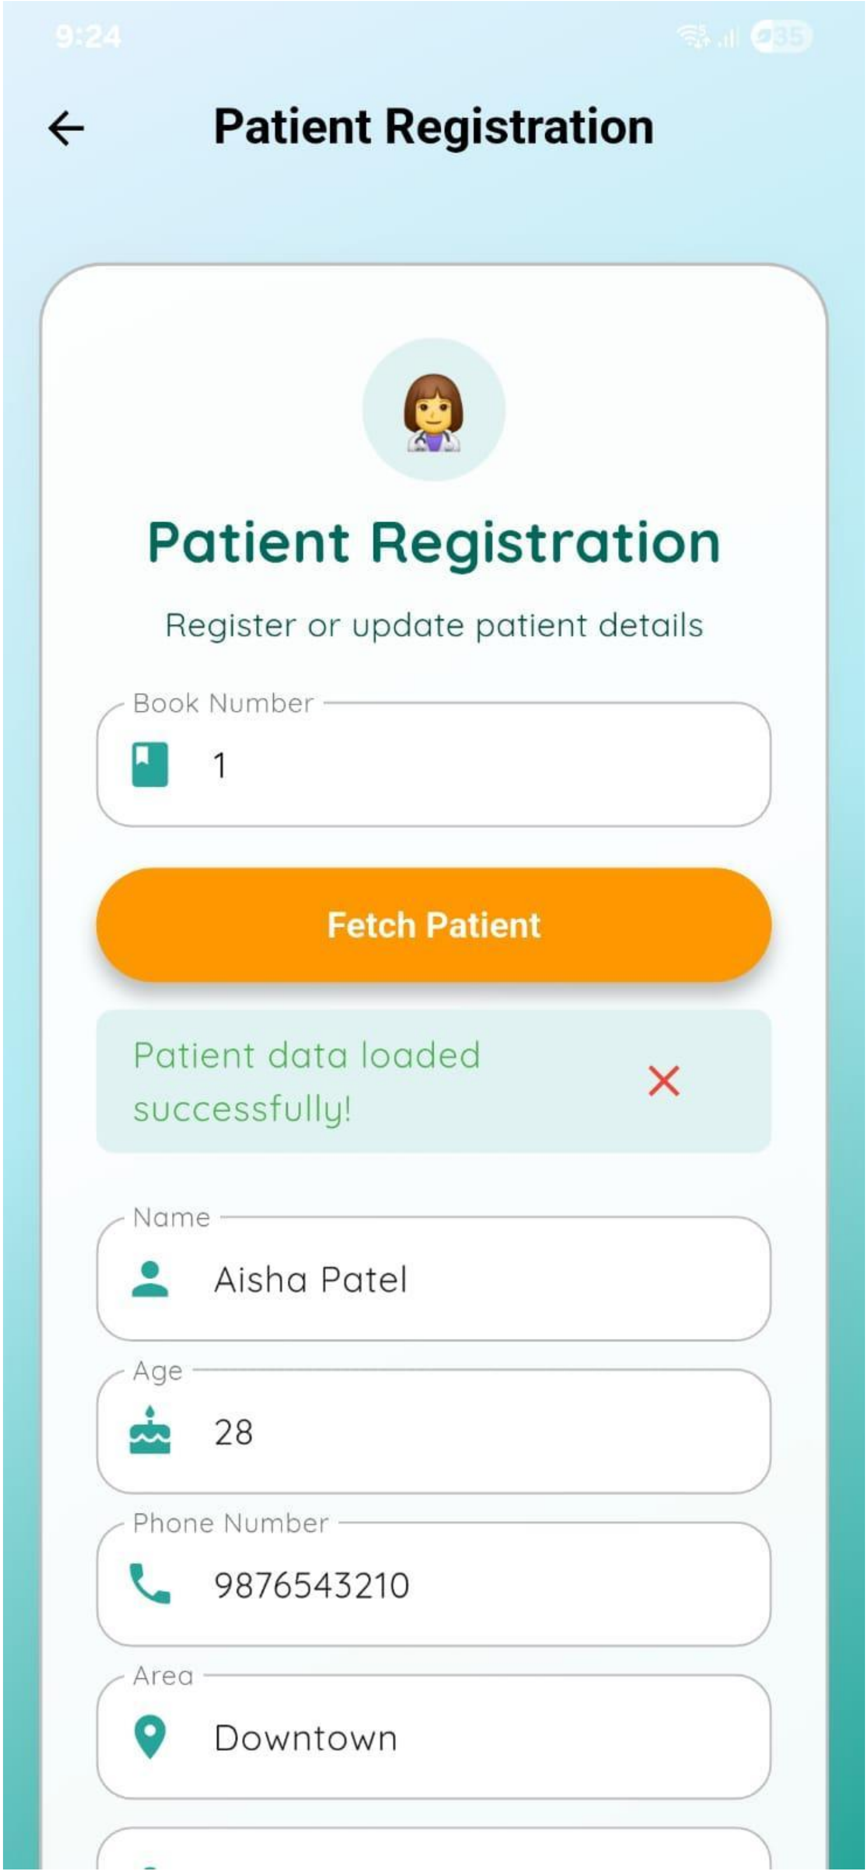
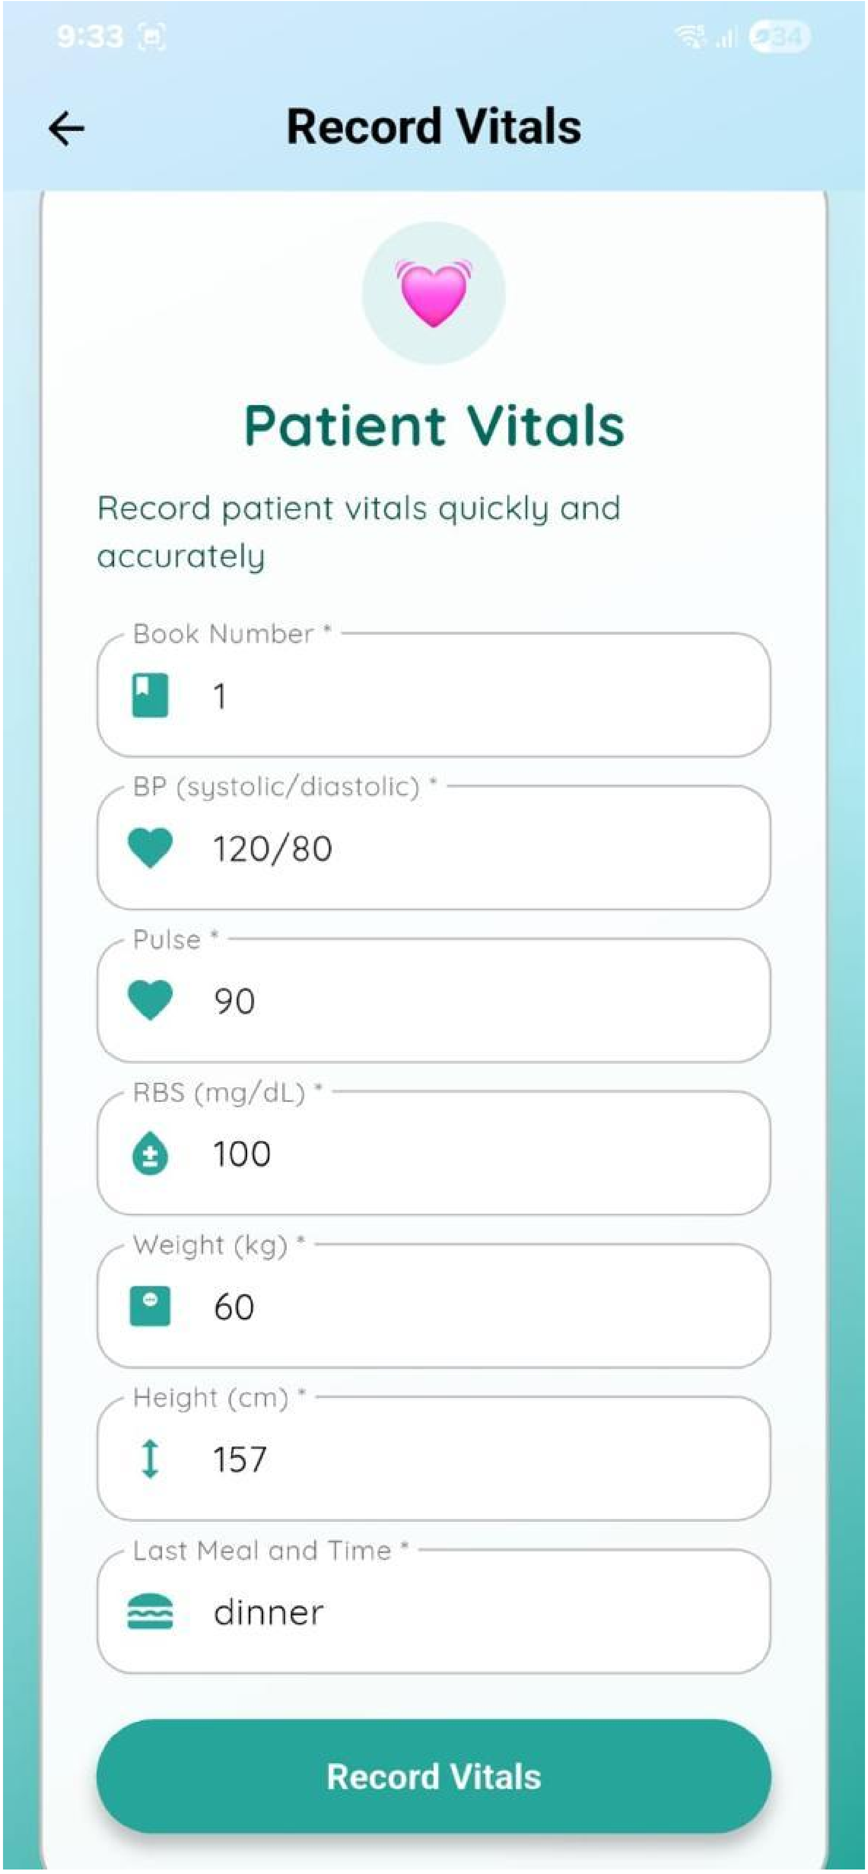
Step 1: Patient Registration

Click on the 'Patient Registration' module to begin entering patient details. This is the first step for all new patients.



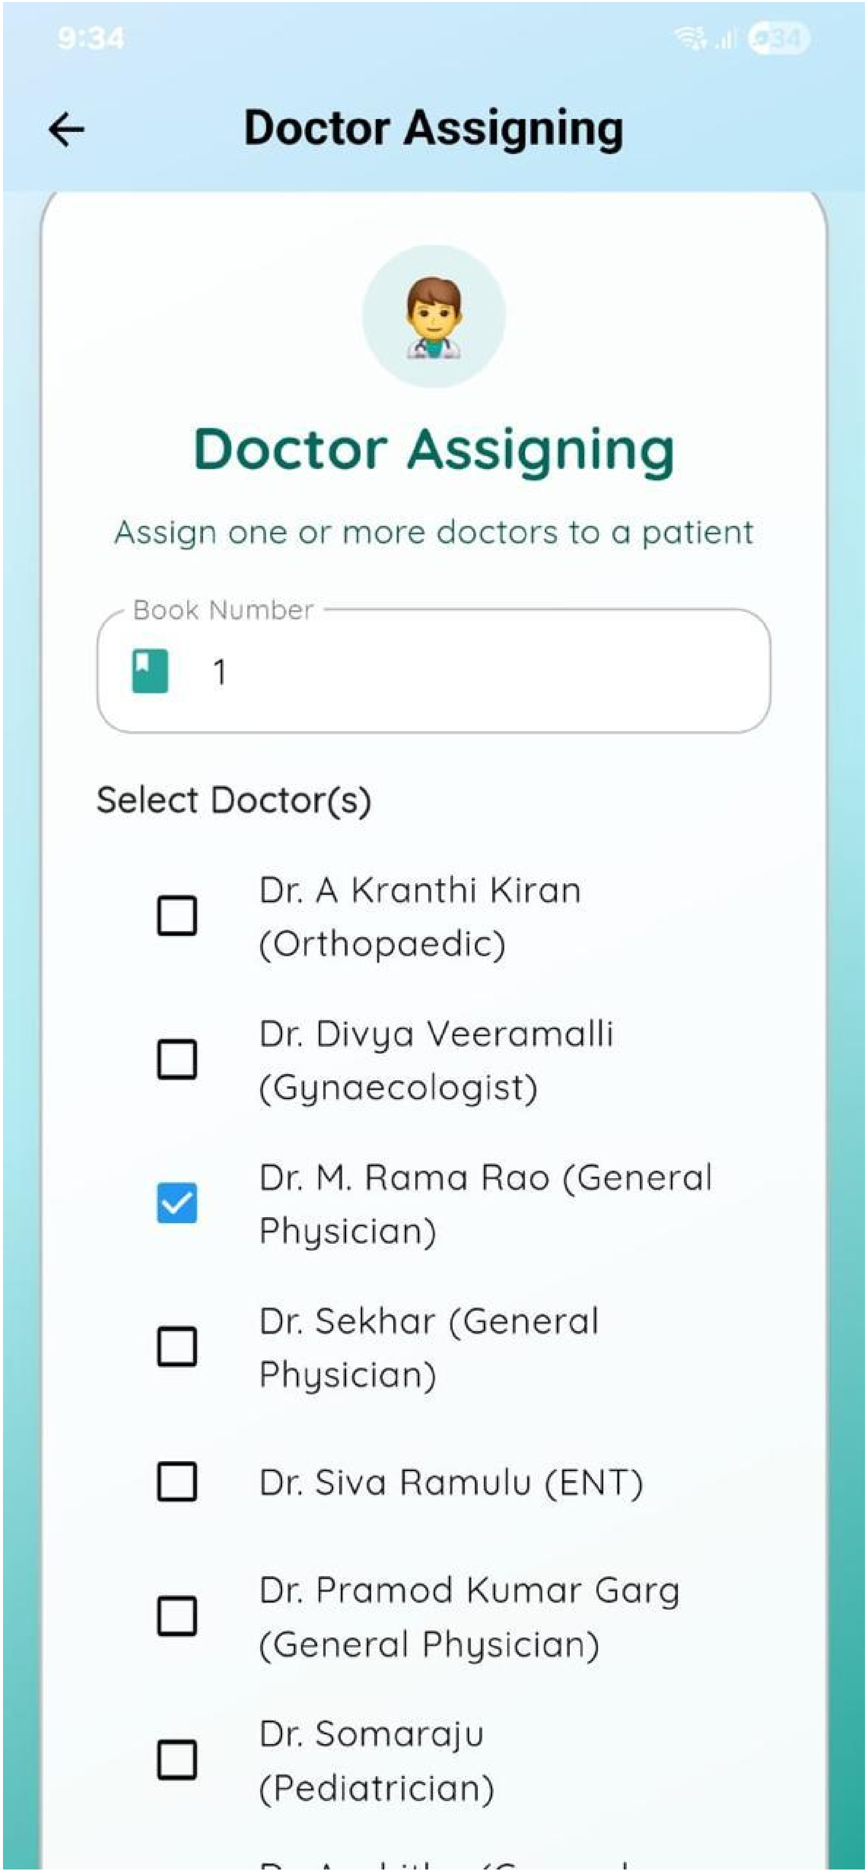
Step 2: Record Camp and Vitals

In the 'Camp Details' section, input vitals such as height, weight, and blood pressure. These values are used for doctor's reference.



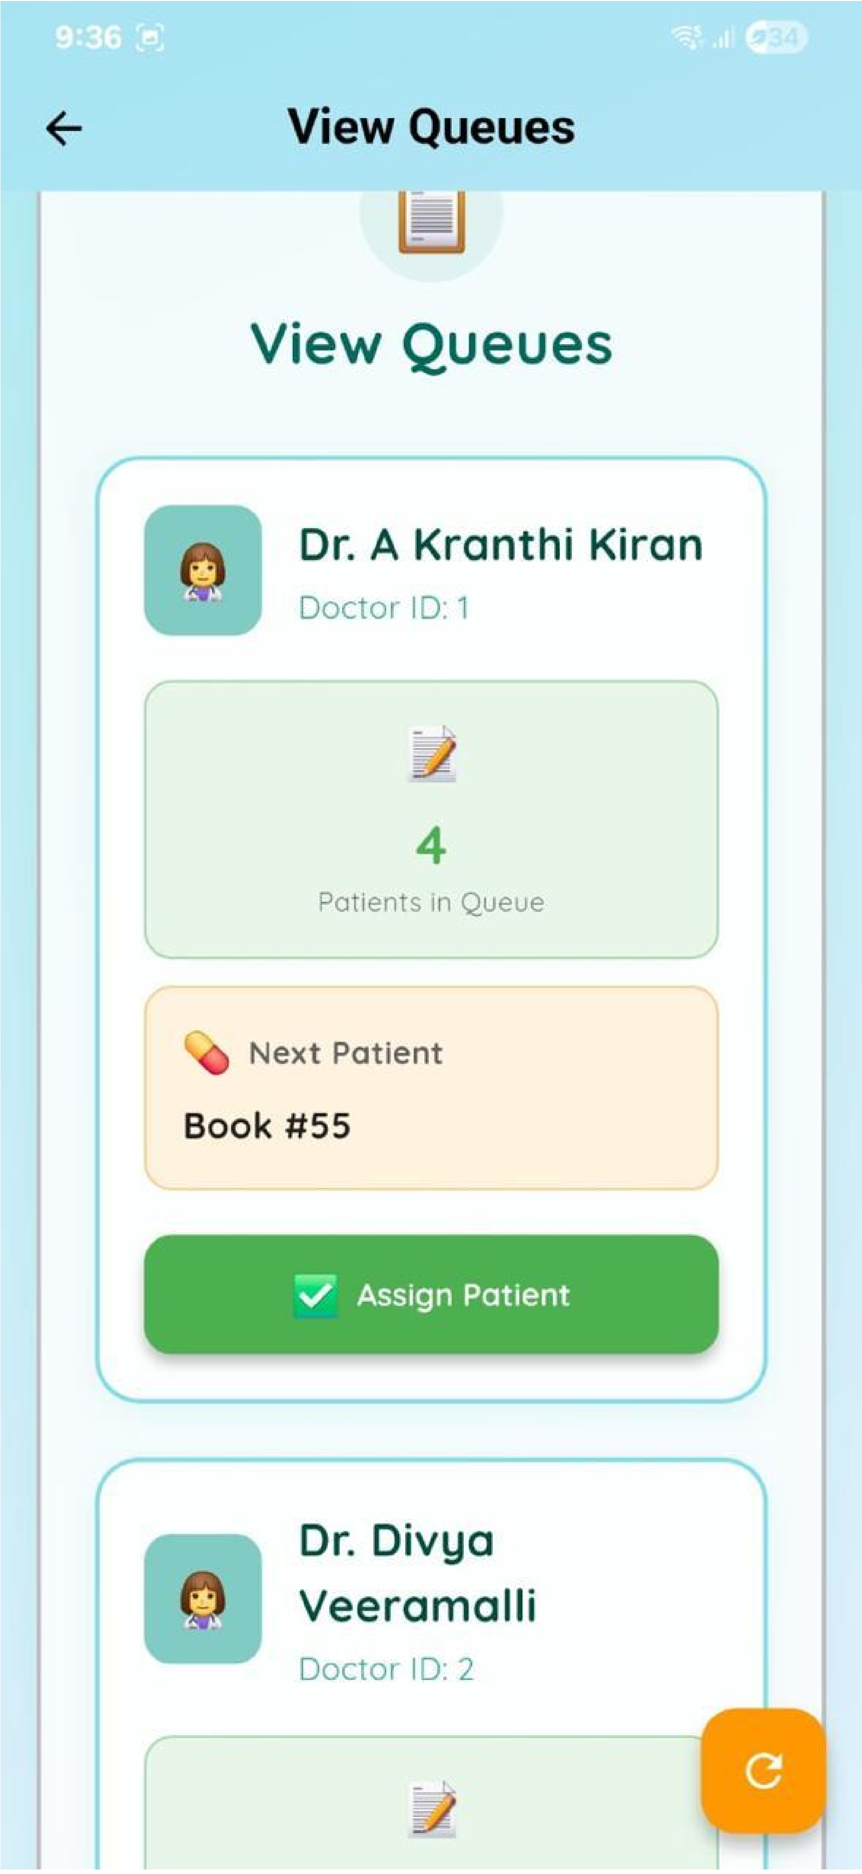
Step 3: Doctor Assignment

Assign the patient to an available doctor using the dropdown. This triggers the doctor consultation process.



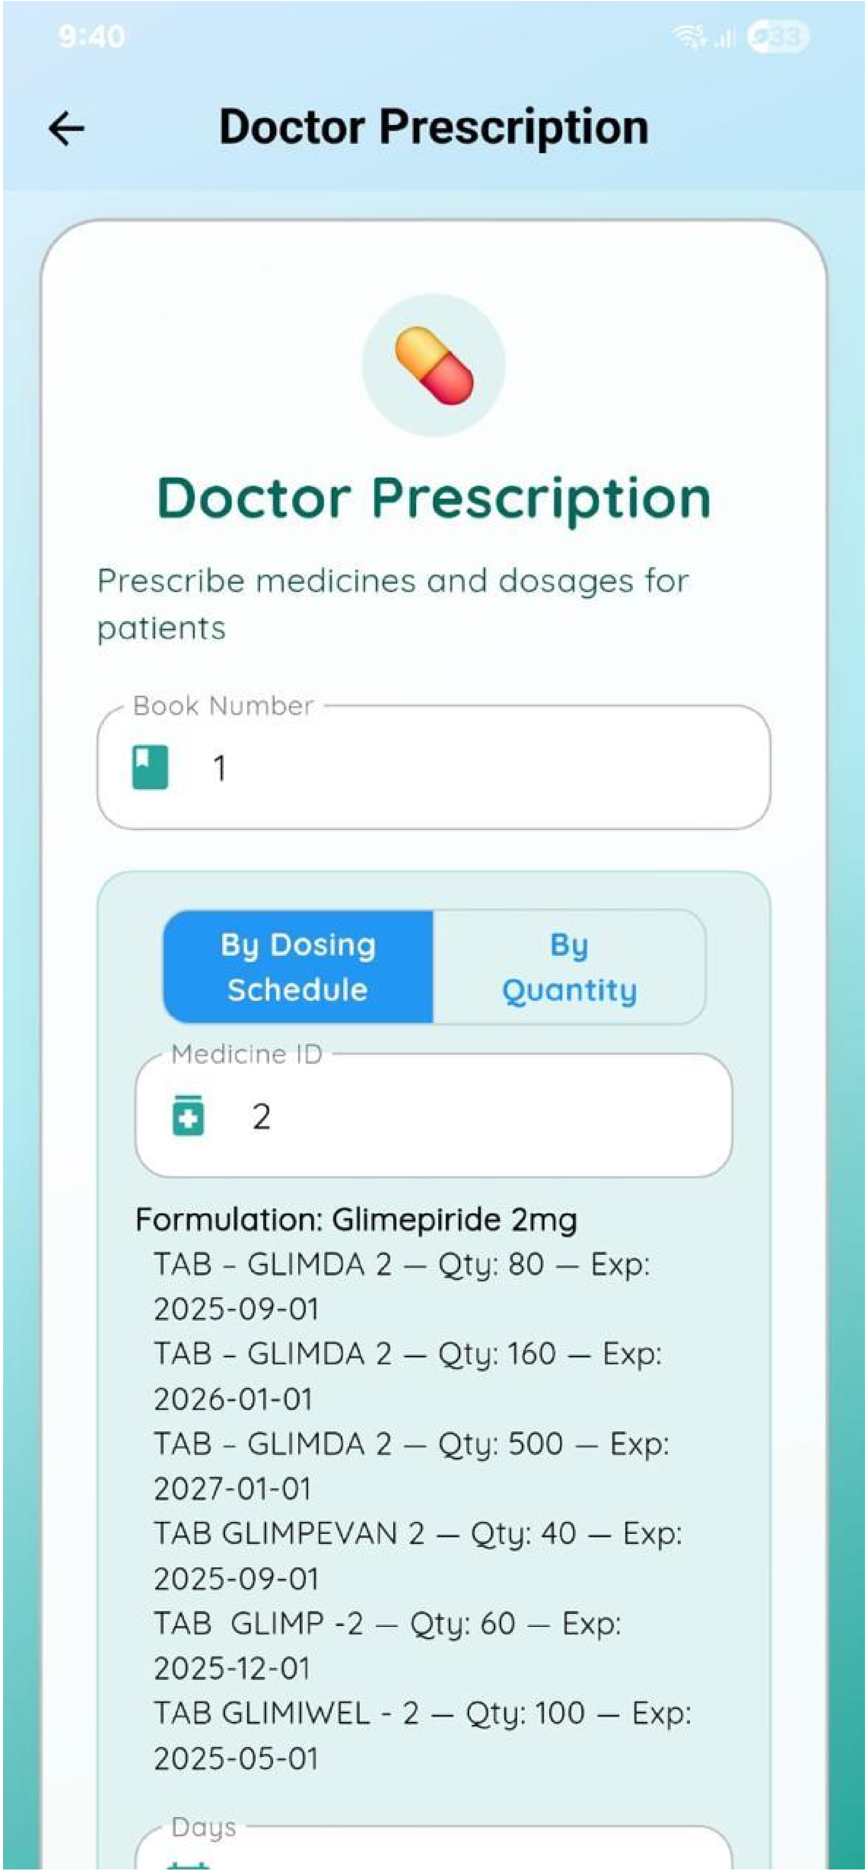
Step 4: View Queues

Monitor the doctor queue and assign the next patient using the 'Assign Patient' button. Helps manage the consultation flow efficiently.



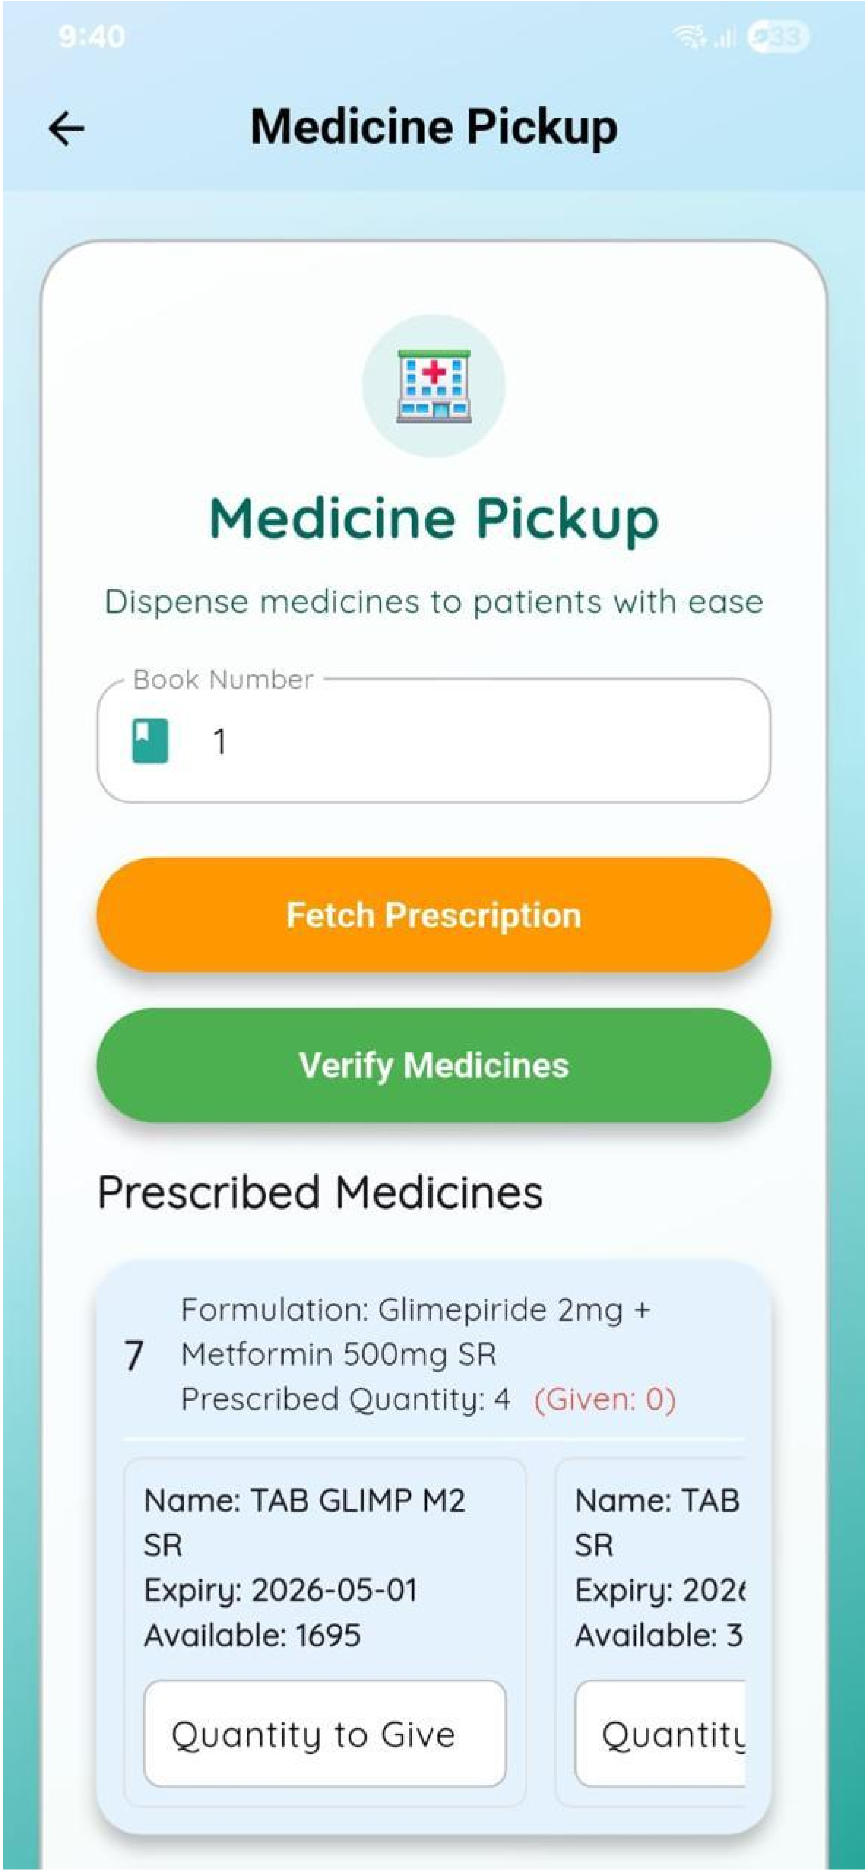
Step 5: Enter Prescription Details

After consultation, enter prescribed medicines into the system. Use generic names where possible to maintain standardization.



Step 6: Dispense Medicines

Go to the 'Dispense' tab to issue medicines based on the prescription. Verify quantities and click submit to complete.



Step 7: Final Verification and Counselling

Use this section to verify dispensed medicines and counsel the patient. Confirm that the patient has received all information.
